Prince's Descriptive Catalogue of Grapes.

CLASS I.—FOREIGN GRAPES—VITIS VINIFERA.

These are in this latitude suitable only for culture in Graperies, with the exception of a few varieties which are sufficiently hardy for training on walls having a southern exposure, such as the Chasselas of several varieties, Delaware, White Tokay, and the early Burgundy or Morillon Varieties. At the South they succeed in open culture.

This collection is remarkably select, and comprises only the most highly approved varieties.

Prices.—These will in all cases be as low or lower than any other Nursery for Vines of similar sizes. Scions of many of the more plentiful varieties can be supplied in January.

Vines of one year, grown in pots, 50 cents; two years, 75 cents; extra large vines selected, \$1 each. When a large number are wanted, a liberal deduction on the prices will be made.

CHASSELAS VARIETIES.

- | | |
|--|---|
| 1. Beach, <i>best early black</i> , SEE CLASS III. | 9 Gros Coulard.
<i>Prolific Sweetwater.</i>
<i>Child's Superb?</i> |
| 2 Blussard blanc, 75c. | 10 Macready's Early White. |
| 3 Chasselas de Fontainbleau.

| 89 Marchioness of Hastings. \$2. | |

Rejected Foreign Grapes: Black Portugal, or Black Ferrar; Miller's Burgundy; Palestine; White St. Peter.

CLASS II.—AMERICAN INDIGENOUS GRAPES.

Prices.—The prices named are for single Vines. When six or twelve, or more of any variety are ordered, a reduction will be made. Extra Large Bearing Vines will be charged in proportion to their value. As the prices of many varieties of Native Grapes will be fluctuating according to the extent of the demands and the relative supply or scarcity, we shall issue Priced Catalogues twice in each year, and we also make this proposal as the basis of our transactions. Any List of Grapes extracted from a priced Catalogue of any reliable nursery will be supplied by us at the same or at lower rates.

Grapes for Vineyards.—Isabella, Catawba, Clinton, and Norton's Virginia can be supplied by thousands of one and two years of age at very reduced rates.

Note.—Our Grape Vines are nearly all grown in the open air, and not forced in Hotheuses, and they are consequently much more hardened to the severities of our climate.

- | | | | |
|--|-----------|---|------|
| 101 Albino or Albiness. | 50 | 117 Big Ozark, (Missouri). | 1 00 |
| 102 Alvey. | 1 50 | 118 Black Guignard, <i>ten vines for \$10, none singly.</i> | |

Longworth's Ohio, is Jack Grape.	Vevay,
Madison,	Winne,
Madison County,	White Isabella, is Hudson's Seedling.
Mathew's Seedling, is Early Isabella.	Wisniew's Seedling, is Winslow.
Milbourn, is Kilbourn.	Wyman, is To Kalon.
Miner's, or Minor's Seedling, is Venango.	York Lisbon, is Alexander.
Muncy, is Catawba.	

DESCRIPTIONS OF SELECT FOREIGN GRAPES.—CLASS I.

Aleppo, Striped, medium, round, large cluster, berries white, black, and half of each color on the same cluster, sweet, sprightly, very productive, hardy, of easy culture.

August Muscat, deemed to be the earliest of grapes, small, black, ovate or roundish, musky, good flavor, the vine of weak growth.

Bishop, large, black, roundish, fine flavor, handsome, estimable.

Black Cluster, small ovate, pleasant sprightly flavor, cluster small and very compact, early, hardy, suited to open culture on walls and trellises.

Black Hamburg, very large, roundish, large clusters, much shouldered, sweet, rich, first quality, very productive, a most popular variety, universally cultivated in Graperies and otherwise.

Black July, earliest of all, small, round, black, cluster small and compact, pleasant sprightly flavor, productive.

Black Lombardy, large, ovate, cluster large, sweet, sprightly flavor, excellent quality, one of the best.

Black Morocco, large, oval, dark red or violet, large cluster, sweet, good flavor.

Black Muscat of Alexandria, large, oval, musky, excellent flavor. It succeeds admirably when grown with the White and Cannon Hall Muscats, under heat ten degrees above that usual for the Hamburg and Chasselas varieties.

Black Prince, large, ovate, cluster long and often shouldered, sweet, rich, productive, excellent quality.

Black St. Peter, large, roundish, long cluster, first quality, ripens late, hangs long after maturity, requires powerful heat.

Bowker, an American Seedling, large, white, ovate, large cluster, as handsome as White Hamburg, and of better quality, pleasant flavor, very productive.

Buckland Sweetwater, much resembles Gros Coulard, large, amber, delicious, beautiful, cluster short and shouldered, compact, ripens early.

Chasselas de Fontainebleau, medium, round, pale amber, sweet, very juicy, refreshing, excellent, very productive in the graperies or against walls, a general favorite, and more extensively cultivated than any other variety.

Chasselas Musqué, medium, round, pale amber, very rich, high musk flavor, excellent.

Chasselas, Rose or Red, medium, round, pale red, sweet, good flavor, very productive.

Chasselas, White, medium, round, loose cluster, sweet, good flavor, estimable but secondary to others of the same class.

De Candolle, large, round, purple, beautiful, cluster very large, sweet, good quality, very productive; requires powerful heat to mature well.

Deccan's Superb, medium, oval, amber, fine flavor, requires great heat to become matured.

Delaware, small, round, clear red, thin skin, not a trace of pulp or foxy flavor, seeds few and small, very sweet, rich and juicy, vinous and aromatic with a slight musk flavor similar to Chasselas Musqué and Red Frontignan; excellent for table and wine; cluster small and compact; it makes delicious amber-colored wine; vine hardy, but of very slender delicate growth like the Rebecca until the third year, after which it grows vigorously. It is not productive when young, but very fully so when it attains considerable size and age; ripens the beginning of September, two or three weeks before the Isabella.

It requires to be protected by training it against a wall or house having a warm southern exposure, or on a trellis in a protected garden, and will then produce a perfect and abundant crop. It is as subject to weak and stunted growth and to mildew as any other foreign variety. This grape, has been widely disseminated as a true native variety, although the Germans in Ohio have from the first declared it to be the Red Traminer of the Rhenish vineyards.

The writer (W. R. P.) having inspected the Vines at Delaware, Ohio, and elsewhere, has fully satisfied himself of its foreign origin. It appears to have been introduced to New Jersey by Mr. Provost, who emigrated from Switzerland, and brought this and other foreign Grapes with him. He cultivated these foreign vines only, as, at that time, no Native Grapes were regarded as suitable for vineyard culture. From Mr. P.'s ground vines were carried by his brother-in-law to Chester county, Penn., where some are now found over twenty years old. Joseph Heath, formerly an employé of Joseph Bonaparte at Bordentown, and now a resident of Delaware, Ohio, carried this vine from that garden to Delaware. Whether Bonaparte obtained his vines from Provost, or imported them direct from Europe is as yet unknown. If seedlings have been found similar, the seeds were undoubtedly dropped by birds, who are especially fond of its early small sweet berries.

The foreign origin of this Grape is also fully established by the fact, that from all recent investigations, it combines every specific attribute of the *Vitis vinifera*, and that it possesses none whatever indicative of indigenous origin.

Dr. Garber of Pa., decides positively that it is not a pure native. Saml. Walker, Esq., Ex-President of the Mass. Horticultural Society, in response to a letter in which I stated my views as here presented, says:—"All you say about the Delaware Grape, I believe will prove to be true; all my plants are very weak and the leaves full of mildew; I think it will be a failure." Indeed, I have not seen any vines grown in *open field culture* that were not greatly affected by mildew, and this has also been the case in some protected gardens when on trellises.

These facts, however, by no means detract from the great excellence and value of this exquisite berry, but only serve to admonish us as to the extra care requisite for its success, and that we must view it as an appendage to the garden, and not as applicable to vineyard culture in this latitude.

Esperione, small, round, dark purple, very large cluster, sprightly flavor, third quality; the vine hardy, vigorous growth, very productive, and suited to outdoor culture on walls and trellises.

Early White Malvasia, or **Early White Sweetwater**, medium, round, pale amber, similar in quality to the Golden Chasselas, but ripens ten days earlier. It is so hardy that it will fruit well under outdoor culture on walls and trellises.

Frankendale, quite distinct from Black Hamburg, of less size and not equal in quality, cluster of similar size, and ripens at the same period.

Frontignan, Black, medium, round, long cluster, rich, musky, excellent, productive, early.

Frontignan, Grizzly, medium, round, gray, becoming red at maturity, medium sized cluster, rich musky flavor, excellent, first quality, early, very productive.

Frontignan, White, medium, round, pale amber, rather large cluster, sweet, musk flavor, excellent, ripens rather early with the Chasselas varieties, vine hardy, productive, and may be grown under open culture in this latitude.

Gros Coulard, large and beautiful, thin skin, white, delicious flavor, long clusters, a superior early variety of Chasselas.

Lombardy, or Flamed Tokay, round, bright red, sweet, medium flavor, second quality, very large cluster, very productive.

Macready's Early White, medium, oval, thin skin very juicy, fine flavor, hardy, productive.

Mill Hill Hamburg, large, purple, excellent flavor, ripens a month after Black Hamburg, requires heat.

Pitmaston White Cluster, one of the largest and finest varieties of the Chasselas, round, amber, never cracks, ripens early, bunch medium, compact. There appears to be a spurious variety under this name.

Portien noir, large, roundish, black, very handsome, peculiar flavor, much esteemed, very late.

Portuguese Muscat, a variety of the White Muscat of Alexandria, but sets its fruit better and has more of the musk flavor, large, oval, pale amber, excellent.

Prince Albert, or Barbarosa, large, ovate, black, large shouldered cluster, handsome, good flavor, ripens late.

Regnier de Nice (*erroneously Reine or Queen of Nice*), large, oval, white shaded with rose color, very beautiful, large cluster, fine flavor.

Red Traminer, small, roundish, rose-color, sweet aromatic, pleasant for dessert, cluster small and compact, vine very hardy, productive. An esteemed Wine and Table Grape on the Rhine and in Switzerland.

Raisin de Calabre, large, round, white, large cluster, juicy, rich, musky flavor, excellent, valuable for hanging late.

Royal Muscadine, White Nice or Xeres. These prove identical ; medium, round, amber, sweet, pleasant flavor, distinguished by its monstrous shouldered loose cluster from the true *Muscadine* varieties, the bunch often weighing four to six pounds ; vine of vigorous growth, good bearer, one of the hardiest of its class.

Syrian White, very large, oval, immense cluster, firm, and when allowed to hang until fully matured, is very good, requires powerful heat to perfect its fruit.

Tokay des Jardins, a beautiful variety of Chasselas, small, rose-colored, very sweet, rich Chasselas flavor, very estimable.

Verdelho, a Madeira grape, small, oval, white, finest quality, a great favorite, vine of strong growth, very productive.

Victoria Hamburg, closely resembles the Black Hamburg, but appears to be an improved variety.

Wilmot's Black Hamburg, very large, round, compressed, very black, quality variable, often fine. It must hang long after coloring in order to mature fully.

White Bual, pale amber, obovate, compact cluster, good flavor, ripens late.

White Corinth. This is not the Sultana ; it is a small, white, seedless grape, in compact clusters, beautiful, sweet, very pleasant flavor.

White Gascoigne, large, ovate, large compact cluster, shouldered, fine flavor.

White Hamburg, large, oval, very handsome, large cluster, good, second quality in flavor.

White Muscat of Alexandria, large, oval, pale amber, long loose branching cluster, crisp, sweet, highest aromatic musky flavor, ripens late. A most exquisite fruit. Cannon Hall Muscat is a variety of this, and the Tottenham Park and Portuguese Muscats greatly resemble it.

White Riesling, small, compact cluster, sweet, pleasant flavor, very productive, a celebrated Rhenish wine grape, and of easy outdoor culture here—being very hardy.

White Chasselas, medium, round, loose cluster, sweet, good flavor, estimable, but secondary to others of the same class.

White Tokay, medium, ovate, compact cluster, moderate size, sweet, perfumed, in flavor similar to the Golden Chasselas, much esteemed, hardy, productive, and suited to open culture.

Zinfandel (*erroneously Zinfundal*), full medium, round, black, thick bloom, very large, double shouldered cluster, requires to hang long after coloring to perfect its maturity.
